

# Hamza Khan

Backend Developer · Python · Django · REST APIs · PostgreSQL

Mumbai · +91-9137966960 · [hamza81khan81@gmail.com](mailto:hamza81khan81@gmail.com) · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Backend developer with experience building and shipping web applications since 2021. I work primarily with Python and Django: REST APIs, database design, real-time WebSocket features. I have taken projects from scratch through to production for clients across India and internationally.

## TECHNICAL SKILLS

---

|                       |                                                                          |
|-----------------------|--------------------------------------------------------------------------|
| <b>Languages</b>      | Python, SQL                                                              |
| <b>Backend</b>        | Django, Flask, REST APIs, FastAPI                                        |
| <b>Databases</b>      | PostgreSQL, MySQL, SQLite                                                |
| <b>DevOps / Cloud</b> | Hostinger, DigitalOcean, Render, Vercel                                  |
| <b>Frontend</b>       | React, Next.js, Vite, Ant Design, Shadcn, Tailwind CSS (supporting role) |
| <b>Tools</b>          | Git, Postman                                                             |

## EXPERIENCE

---

**Freelance Backend Developer** | Brandenbed Living Spaces, Berlin (Remote) *Sept – Nov 2025*

- Built and deployed the company's production website (95+ PageSpeed score) and an internal CRM with role-based access, property management, and client communication workflows.

**Freelance Backend Developer** | Self-employed *2021 – 2025*

- Delivered backend systems for clients across India and internationally: REST APIs, authentication, real-time features, and cloud deployment across Django and Flask.

## PROJECTS

---

**InitCore CRM: Call Center Platform** [GitHub](#)

- Django + PostgreSQL CRM with real-time agent monitoring via Django Channels and WebSockets, multi-role access, lead management, payment processing, and PDF invoice generation. Handles 1,000+ daily transactions.

**Key2YourHome: Real Estate Platform** [GitHub](#) · [Live](#)

- Backend for a live property listing marketplace. Built the REST API layer, search and filter system, and database schema for 500+ active listings. Query optimisation cut API response time by 45%.

**FlaskSearch API** [GitHub](#)

- RESTful search microservice using Flask and Elasticsearch with full-text search, pagination, and filtering over large document datasets. Containerised with Docker for standalone deployment.

**TariqPerfumes: E-Commerce Backend** [GitHub](#)

- Full e-commerce backend for a retail perfume business. Includes product catalogue, shopping cart, order management, dual pricing, and an AdminLTE dashboard for store operations.

## EDUCATION

---

**B.Tech – CSE (Data Science)** | University of Mumbai

*Expected July 2026*

Saraswati College of Engineering, Kharghar · SGPA: 9.32 → 8.04 → 8.2 (Sems 5–7)

ACHIEVEMENTS

---

**Smart India Hackathon 2025, Grand Finalist** Selected from 50,000+ teams nationwide; built a working solution in a 36-hour sprint.

**SCOE Avishkar 2024, 2nd Place (Team Lead)** University of Mumbai engineering competition, recognised for technical execution.

**CodeCrafters 2.0 Hackathon, Participant** Built a digital asset management tool with React in a 48-hour sprint at Saraswati College of Engineering.
