PROFESSIONAL SUMMARY

Backend Developer with 4+ years of experience building scalable web applications, REST APIs, and real-time systems using Python and Django. Proven ability to design production-grade backend architectures, optimize databases, and deploy cloud-based applications. Experienced in developing systems used by real clients with a focus on performance, reliability, and maintainability.

TECHNICAL SKILLS

Programming Languages:	Python, SQL
Backend Development:	Django, Flask, REST APIs, FAST APIs
Databases:	PostgreSQL, MySQL, SQLite
Cloud & DevOps:	Render, DigitalOcean, Hostinger, Google Cloud Platform
Tools:	Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer Sept 2025 – Nov 2025

Brandenbed Living Spaces, Berlin (Remote)

- Developed and deployed the company's main production website with backend services and optimized API performance.
- Built an internal CRM backend supporting multiple user roles, authentication, and operational workflows.
- Improved application performance and deployment reliability through optimized backend architecture.

Freelance Backend & Full Stack Developer 2021 – 2025

Self Employed | Remote

- Built and deployed 10+ production-ready web applications and backend systems for international and local clients.
- Designed scalable REST APIs using Django and Flask supporting real-time data processing and multi-user environments.
- Implemented PostgreSQL database schemas and optimized SQL queries improving system response times by up to 40%.
- Containerized backend services using Docker and deployed applications on AWS and cloud platforms.
- Developed real-time backend services using WebSockets to support concurrent user activity and live data updates.

PROJECTS

INITCORE CRM Call Center System

- Designed a backend CRM system using Django and PostgreSQL supporting multi-role access for agents and administrators.
- Implemented WebSocket-based real-time communication for live monitoring and operational analytics.
- Built backend modules for lead management, call logging, payment tracking, and PDF invoice generation.
- System handled 1,000+ daily transactions across multiple concurrent users.

Key2YourHome Real Estate Platform

- Developed backend architecture using Django REST APIs and PostgreSQL for a scalable property listing platform.
- Implemented advanced search and filtering features enabling efficient management of 500+ property listings.
- Optimized database queries reducing API response time by 45%.

QSync Queue Management System

- Built backend API services integrated with real-time WebSocket communication for queue synchronization.
- Designed system architecture supporting multiple terminals and real-time updates for high-traffic environments.

FlaskSearch Search Engine API

- Developed a scalable REST API using Flask and Elasticsearch for high-performance full-text search.
- Implemented pagination, filtering, and query optimization for large datasets.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (Data Science)

Expected July 2026

University of Mumbai

Diploma in Computer Engineering

Completed 2023

University of Mumbai

ACHIEVEMENTS & AWARDS

Smart India Hackathon 2025 – Grand Finalist

- Selected among 50,000+ teams nationwide for building scalable real-world solutions under a 36-hour development sprint.

SCOE Avishkar 2024 – 2nd Place

- Recognized for innovation and technical execution in university-level engineering competition.
