PROFESSIONAL SUMMARY

Python Backend Developer with 4+ years of production experience building Django REST APIs, real-time WebSocket systems, and PostgreSQL-backed applications for international and local clients. Delivered live systems handling 1,000+ daily transactions and 500+ property listings. Smart India Hackathon 2025 Grand Finalist among 50,000+ teams. Final-year B.Tech CSE (Data Science) student at University of Mumbai, graduating July 2026.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Backend	Django, Django REST Framework, Django Channels, Flask, WebSockets, REST APIs, Celery
Databases	PostgreSQL, MySQL, SQLite, Elasticsearch
DevOps & Cloud	Docker, AWS (EC2, S3), Google Cloud Platform, DigitalOcean, Render, CI/CD
Tools	Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Sept 2025 – Nov 2025

Brandenbed Living Spaces, Berlin, Germany (Remote)

- Designed and deployed the company's main production website for a Berlin-based real estate firm, achieving 95+ Google PageSpeed score with full cross-device compatibility.
- Built an internal CRM backend with role-based access control (agents, admins), integrated authentication, and end-to-end property management and client communication workflows.
- Optimized API performance and backend architecture, improving deployment reliability and system scalability across European markets.
- Collaborated with cross-functional international teams ensuring smooth integration and on-time delivery.

Freelance Backend & Full-Stack Developer

2021 – 2025

Self-Employed | Remote

- Architected and deployed 10+ production-ready web applications and backend systems for international and local clients, managing the complete SDLC from backend logic to database optimization.
- Designed scalable REST APIs using Django and Flask supporting real-time data processing and multi-user environments with concurrent WebSocket connections.
- Implemented PostgreSQL database schemas and optimized SQL queries improving system response times by up to 40%.
- Containerized backend services using Docker and deployed on AWS (EC2, S3) and GCP, maintaining 99.9% uptime on production systems.
- Reduced deployment time by 60% through CI/CD pipeline automation and infrastructure scripting.

PROJECTS

InitCore CRM — Call Center Platform | [GitHub](#)

- Designed enterprise-grade CRM using Django and PostgreSQL with multi-role access control (agents, supervisors, administrators) for a call center operation.
- Implemented WebSocket-based real-time communication via Django Channels for live monitoring and operational analytics across 50+ concurrent users.
- Built backend modules for lead management, call logging, payment tracking, attendance, and automated PDF invoice generation.
- System handles 1,000+ daily transactions with high availability across multiple concurrent users.

Key2YourHome — Real Estate Platform | [Live: www.key2yourhome.co.in](http://www.key2yourhome.co.in) | [GitHub](#)

- Engineered full-stack property marketplace using Django 5.2 with OAuth authentication and Grappelli admin managing 500+ property listings.
- Implemented advanced search and filtering features for efficient property discovery with Tailwind CSS frontend.
- Optimized PostgreSQL queries and backend architecture reducing API response time by 45%.

QSync — Real-Time Queue Management System | [GitHub](#)

- Built real-time queue management SPA using React 19 with WebSocket integration, React Query, and Zustand state management.
- Designed system architecture supporting multiple terminals and high-traffic concurrent environments with Spring Boot backend integration.

FlaskSearch — RESTful Search Engine API | [GitHub](#)

- Architected scalable REST API using Flask and Elasticsearch for high-performance full-text search over large datasets (Shakespeare corpus).
- Implemented pagination, filtering, and query optimization; containerized as a production-deployable microservice using Docker.

EDUCATION

Bachelor of Technology – CSE (Data Science)

Expected July 2026

University of Mumbai, Navi Mumbai

SGPA: 9.32 (5th Sem) | 8.04 (6th Sem) | 8.2 (7th Sem) — Consistent 8.0+ since 5th Semester

Diploma in Computer Engineering

Completed July 2023

University of Mumbai | 72.63%

ACHIEVEMENTS & AWARDS

Smart India Hackathon (SIH) 2025 — Grand Finalist

- Selected as Grand Finalist among 50,000+ teams nationwide in India's most prestigious engineering hackathon (Ministry of Education, GoI). Built a scalable real-world solution under a 36-hour development sprint at BPUT, Rourkela, Odisha.

SCOE Avishkar 2024 — 2nd Place (Team Leader)

- Led team to 2nd position in University of Mumbai engineering competition, recognized for technical innovation and project viability.

CodeCrafters 2.0 Hackathon — University of Mumbai, March 2025

- Designed and developed a digital asset management solution for financial instruments using Spring Boot and React in a 48-hour sprint.
